## TOKENOMICS

Ok, so let's cut the chase and finally get to the part you really care about... the Malverde (\$VERDE) Tokenomics!

It's simple, no taxes, no random wallets, no BS... full transparency to our investors.

- **No Taxes.**
- **Locked Liquidity.**
- **Mint authority revoked** - No more tokens will be minted.
- **Contract ownership renounced /Contract made immutable** - It cannot be altered or tampered with once deployed.

**Total Supply: 131,122,251,845**

### **Why this amount?**

If you look at it closely, we've spelled out "Malverde" with the numbers corresponding to the letter of the alphabet.

### **Token Allocation:**

- **80%** Liquidity provision on decentralized exchanges (DEXs) (Raydium, Jupiter).
- **12%** Reserved for centralized exchanges (CEX).
- **2%** Prizes, airdrops, and other community incentives.
- **2%** Marketing and Development.
- **4%** Founders.

## LIQUIDITY POOLS

The Malverde (\$VERDE) token has created a locked liquidity pool with the stablecoin \$USDC. This provides:

- **Reduced Volatility:** Stability is Key! \$USDC Stablecoins are pegged to the value of the US dollar fiat currency, providing a “stable” value. Less drama, more stability; stability is like your wingman. Stablecoins provide a predictable environment, avoiding rollercoaster rides.
- **Building Trust:** It's like building trust before hitting the high notes. A stablecoin pool can be a steppingstone, allowing you to dip your toes in without the fear of getting soaked.
- **Lower Impermanent Loss Risk:** Since stablecoins aim to maintain a stable value, the risk of impermanent loss (temporary loss of funds due to price fluctuations) is generally lower compared to pools with volatile assets.
- **Predictable Gains:** Liquidity providers can have a more predictable expectation of returns due to the steady value of the stablecoin. Your gains are like a smooth jazz track – predictable and easy on the ears.
- **Future Diversification:** As the project matures, the Malverde Meme (\$VERDE) token will be offering liquidity pools with both: stablecoins (\$USDC), and the SOLANA (\$SOL) native coin to provide the community with more options and diversification. We have to give the native Ecosystem a little love eventually, right?
